# SVN-Menu Installer

1. Update your working copy
2. There is a file name 'install_svn-menu.sh' inside the 'pub' folder
3. Right click and open terminal
4. Make the script executable : 'chmod +x install_svn-menu.sh'
5. Run the script : 'bash install_svn-menu.sh'
6. Read and follow the commands
7. If you got the following:
"The installation SUCCEEDED, try the new command, by entering 'svn-menu' in terminal"
 then you are good to go.
